PREFACE

PUBLICATION CUTOFF DATE

1. Marine Corps Stock List, SL-3-00418A, is current as of 14 February 1977.

SCOPE

2. This publication lists all component and accessories for collection-type supply items, such as major combinations, systems vehicles groups outfits, kits, sets or assortments. The components to be issued with the end item will be identified under the heading of "Supply System Responsibility" and when required under the heading "Collateral Materiel". End item as requiring Collateral materiel are governed by whether the end item is initial or replacement issue. The ICP will direct whether the initial issue of the end item is with a collateral materiel set or replacement issue without collateral materiel. The components to be issued will consist of the quantity of items annotated in the 'Quantity Used in Unit' column. The "Using Unit Responsibility" column will reflect those items that are to be requisitioned separately through the supply system when applicable.

LIST OF COMPONENTS

3. This listing comprises the major portion of this publication. The data is arranged in columnar form and contains the information needed to properly identify the item and determine its type of issue.

4. Item Number (Column 1). This column contains a number assigned to each item as it appears in the list. Numbers are assigned in sequence and are for reference purposes only.

5. Stock Number (Column 2). This column contains the National Stock Number (NSN) assigned to the item.

6. Reference Designator/Figure-Key (Column 3). This column contains circuit-symbol number designators or figure and index numbers to refer an item to a circuit diagram or illustration.

7. Model (Column 4). This column indicates by an alphabetical code the specific application of components, or assemblies when more than one model of the end item is contained in this publication.

8. Item Identification (Column 5). This column contains the item name and description listed under the sub-heading of either "SUPPLY SYSTEM RESPONSIBILITY", "Publications", "Collateral Materiel" or "USING UNIT RESPONSIBILITY" (See paragraphs 11, 12, and 13).

9. Unit of Measure (Column 6). This column contains the measurement standard of an item as used with the specific end item. It may or may not be the same as the unit of issue. For example, the unit of issue of a certain wire is by coil but only 4 feet are required for the end item. Therefore, the unit of measure shown herein will not be used for requisitioning purposes. For the proper unit of issue and other required management data, refer to the applicable Management Data List (ML) when requisitioning.

10. Quantity Used in Unit (Column 7). This column contains the total quantity of an item according to the unit of measure, required for full functional operation of the end item.

SUPPLY SUPPORT CATEGORIES

11. Supply System Responsibility. All, or a portion, of the items in this category, as appropriate, for the type of issue, will be furnished by the supply system. Any item requiring replacement, while the end item is outside the stores distribution system, is the responsibility of the holding organization or using unit.

12. Collateral Materiel. All of the items in this category will be furnished with the end item when the end item is being shipped as initial issue. The 9999-00-000-0000 NSN shown under the heading of collateral material (column S) is for control within the distribution system only and is not authorized for requisitioning purposes.

13. Using Unit Responsibility. Items in this category will not be issued with the end item. They must be requisitioned through the supply system. The end item will be complete only when the total quantity of items shown in the 'Quantity Used in Unit' column as well as those items listed under the heading "Supply System Responsibility" and "Collateral Materiel" are on hand.

5TH ECHELON REHABILITATION PROGRAM

14. Major items returned under this program will be evacuated under the provision Of the applicable Marine Corps Order(s) with the items listed under Supply System Responsibility. Repair, rebuild and replacement under a 5th Echelon rehabilitation program will be limited to these items only. The publications shown under the heading "Publications" and those items under the heading "Collateral Materiel" shall be held by using organization for application to the replacement end items.

CHAN6ES

15. Changes to this publication will be issued as required.

REQUEST FOR ADDITIONAL COPIES

16. Additional copies of this publication may be requisitioned from the Commanding General, Marine Corps Logistics Support Base, Atlantic, (Code A826), Albany, Georgia 31704.

ERRORS AND RECOMMENDATIONS

17. Errors in this publication, or recommendations for its improvement should be submitted by using NAVMC 10772 "Report of Discrepancy in Supply Publications Form" provided each Command for this purpose. If this form is not adequate to cover a particular situation or recommendation, a letter should be directed to the Commanding General, Marine Corps Logistics Support Base, Atlantic (Code P841) , Albany, Georgia 31704.

MISCELLANEOUS

18. For full information concerning the Marine Corps Stock List publications system, including its purpose and use and the principles employed in its compilation, see Marine Corps Stock List, SL-1-1, Introduction to Marine Corps Stock List Publications; for indexes thereof, see Marine Corps Stock Lists SL-1 -2, Index of Authorized Publications for Equipment Support, and SL - 1-3, Index of Publications Authorized and stocked by the Marine Corps (PASMCI).

SUPERSEDURE

19. This publication supersedes Marine Corps Stock List, Components List SL-3-00418A, dated March 1968.

7360-00-543-7037

KITCHEN AND GALLEY OUTFIT, FIELD:

SE

FUNCTIONAL DESCRIPTION : The Kitchen and Galley Outfit, Field, General Officers Set C is comprised of various types of hand, mechanical and electrical food preparation equipment.
